2016 SBOE Candidate Questionnaire

Additional responses to questions related to the State Board of Education's Authority and Process submitted by:

Rebecca Bell-Metereau (D)
Candidate for SBOE District 5

“SBOE is an elected body that should consider itself responsible to educators, school children, and voters, not to political ideology. Public comment should be conducted in a fair and even-handed way that allows everyone to participate equally. The current process is very biased and disrespectful, and it should be administered in a more just and useful way, rather than serving as an opportunity for board members to sound off on their pet theories and eccentric views. Scholars, teachers, and true experts in their fields should be valued contributors to the process.”
